4.0 EVALUATION OF BIDS:

- 4.1 Bids will be evaluated based on the pre-qualification criteria and other requirements stipulated in the tender enquiry.
- 4.2 Bidder shall quote for both items of work in the Price Bid Format (BOQ-Annexure IX). Bids not complying with the above will not be considered. Evaluation of bids and determination of the L1 bidder shall be based on the combined total value of all items of work quoted by the bidder in the Price Bid Format. The combined total value as above shall be computed based on the rates quoted by the Bidder against each item and the corresponding quantities indicated. The work order issued shall contain both items of work. The rate quoted shall be applicable for transportation of the material loaded into barge(s) either using the conveyor system at Q-10, WI or loaded into barge(s) direct from the ship or other than through the conveyor system at Q10/any other Berth at Cochin Port.
- 4.3 If there is a tie in the L1 position, the tie shall be broken by obtaining revised reduced rates in sealed covers from the L1 bidders.

5.0 SPLITTING OF WORK:

- 5.1 Considering the critical nature of work and to have flexibility in movement operations, FACT proposes to engage more than one contractor for the work as per this enquiry. The work shall be split among more than one bidder, even if the L1 bidder is having full capacity requirement, i.e.2000 MT per day, for the work. The L1 bidder will be awarded contract for movement up to a maximum of 70% of the total quantity to be moved and the balance 30% of the total quantity will be ordered on the L2, L3, L4...bidders in that order, subject to conditions as below:
- 5.2 The peak movement requirement of 2000 MT per day (considering peak daily movement requirement to FACT-CD and UC) will be treated as the full capacity requirement for the work. The daily movement capacity of a bidder shall be assessed based on the carrying capacity of barge(s) offered as per 2.2 of Annexure-IV, assuming one trip per day per barge. FACT's decision on the above shall be final and binding on the bidders. In case the barge(s) can carry only lesser quantity than the approved capacity stated under 2.1 of Annexure-IV, only the quantity as per 2.2 of Annexure-IV will be considered for computation of movement capacity of a bidder.
- 5.3 Daily Peak Movement requirement as required by user shall be complied with (max.2000MT). If there is any shortfall in the Daily Peak movement requirement, necessary recovery shall be made as per clause 7.3 of Special Terms and Conditions of Contract.
- 5.4 A bidder with daily movement capacity of 1400MT (i.e., 70% of daily peak movement requirement) or above will be awarded only 70% of the total estimated quantity in case he becomes the L1 bidder. In case the L1 bidder has a daily movement capacity less than 1400 MT, he will be awarded a quantity in proportion of his daily movement capacity to the daily peak movement requirement of 2000 MT. The balance quantity will be awarded to the L2 bidder, provided he matches the L1 rate, and if he has movement capacity to meet the remaining daily peak movement requirement, after considering the daily movement capacity of the L1 bidder. If the L2 bidder does not meet the balance daily peak

movement requirement in full after considering the L1 bidder, he will be awarded a quantity in proportion of his daily movement capacity to the daily peak movement requirement of 2000 MT and the L3 bidder will be considered for award of the work for the remaining quantity and so on. If the L2 bidder does not match with the L1 rate, then the L3, L4, L5..... bidder in that order will be considered for award of balance quantity to meet the peak daily movement requirement.

In case balance quantity still remains to be awarded even after matching the L1 rate by other bidders, FACT reserves the right to award maximum quantity to the L1 or L2, L3....bidders in that order, who have matched the L1 rate to the extent of movement quantity these bidders are able to offer.

- 5.5 In case none of the other bidders matches the rate of the L1 bidder, FACT reserves the right to award maximum quantity to the L1 bidder which he is able to offer to meet movement requirement.
- 5.6 Splitting of the estimated total quantity of **5,50,000 MT (for two years)** shall be made in the ratio of daily movement capacity of bidders to the daily peak movement requirement of 2000 MT as detailed above.
- 5.7 In case more than one bidder becomes L1, the tie shall be broken by obtaining revised reduced rates in sealed covers from the L1 bidders and the revised reduced L1 rate obtained thereafter shall be applicable for matching and splitting purposes as detailed above. In case more than one bidder becomes L1 even after obtaining revised rates as above and the total daily movement capacities offered by the L1 bidders altogether equal or exceed the total daily peak movement requirement of 2000 MT, the total estimated quantity of 5,50,000 MT (for 2 years) will be split among them in proportion of the offered daily movement capacity of each of these bidders to the total daily movement capacity of all the L1 bidders adjusted to the total daily peak movement requirement of 2000 MT. In such cases, splitting in the ratio of 70:30 is not envisaged. FACT's decision on the above shall be final and binding on the bidders.

In case more than one bidder becomes L1 even after obtaining revised rates as above and the total daily movement capacities offered by these bidders altogether do not meet our daily peak movement requirement of 2000MT, the quantity remaining after awarding contract to the L1 bidders (in proportion of the offered daily movement capacity of each L1 bidder to the total daily peak movement requirement) will be allocated to the L2, L3, L4.....bidders in that order (if they match L1 rate) based on method already indicated.

- 5.8 Decision of FACT on splitting order shall be final and binding on the bidders.
- 5.9 Illustrations are given below showing the method of splitting the order and apportionment of quantities:

Illustration-1:

Daily movement capacity of L1 Bidder (A) :4000 MT.
Daily movement capacity of L2 Bidder (B) : 2000 MT.

1.0 Scope of Work:

Loading of materials into the barges and unloading of the same at destinations will be in the scope of FACT. The material shall be loaded into the barge(s) either using the conveyor system at Q-10 berth (WI) or loaded into the barge(s) directly from the ship or other than through conveyor system at Q10 berth/any other Berth at Cochin Port.

1.1 Loading Point: at Willingdon Island, Cochin Port.

1.2 Unloading Points:

Boat Basin at FACT-UD at Udyogamandal

Boat Basin at FACT-C D at Ambalamedu.

1.3 The transportation of Sulphur & Rock Phosphate includes provision of suitable self propelled barge(s), piloting, escorting and making arrangements at contractor's cost for overcoming infringements, if any, to create a passage for movement in the canals.

1.4 The contractor shall have to transport materials from WI either to FACT-UC or to FACT-CD, or to both UC & CD, to meet raw material movement requirement of FACT.

1.5 During execution of the work, the quantity allocation for movement by each contractor on a periodic/daily basis will be made in the ratio of the work order quantity on each contractor to the total estimated quantity for movement for two years. Allocation of the barge(s) of the contractor (s) to UC or CD or to both UC and CD will be decided by FACT based on the requirement of raw materials by plants at UC/CD, requirement of unloading from ships without FACT incurring demurrage, storage space limitations at UC/CD, performance of the equipments at loading / unloading points etc. Decision of FACT in this regard will be final and binding on all the contractors.

In case a contractor does not place adequate Barges to meet his allotted quantity as above, FACT reserves the right to allot the shortfall quantity of such defaulting contractor to other contractor(s). In such cases, the defaulting contractor will have no claim for moving the shortfall quantity on a subsequent date. However, on a periodic basis, FACT shall review the total quantity actually transported by a contractor till that period, vis-a vis the quantity which should have been moved by him till that period based on the allocation. Based on the periodic review, if the actual quantity transported by the contractor is found to be lower than the quantity allotted to him and if the shortfall has occurred due to reasons not attributable to the contractor, FACT will consider allotting the shortfall quantity in part or full to the same contractor subsequently, if he places adequate barges for the movement. FACT's decision in this regard shall be final and binding on all the contractors.

2.0 Quantity:

2.1 The estimated total quantity of Sulphur and Rock Phosphate to be transported by barges for 2 years is approx. **5,50,000 MT** (i.e., 5,25,000 MT approx. to FACT-CD and 25,000 MT approx. to FACT-UC).
