FACT, a Government of India Enterprise, has a rich pool of qualified and experienced Engineers and Managers, specifically in the field of Fire & Safety Engineering. Besides, the organization has a variety of firefighting equipment and state-of-the art firefighting installations. The Fire & Safety department of the Company is recognized as an effective and functional resource of Ernakulum District, capable of meeting any major industrial peril. No doubt, the men and machine at the disposal of FACT, forms the back bone to provide the most practical training to students in Fire & Safety Engineering.

Fire & Safety Engineering is an expanding discipline having impact on almost all walks of life, particularly in construction industry. The job market is open for Operators / Engineers to manage Fire & Safety in novel and often unique circumstances.

FACT is conducting a One Year Diploma Course in Fire and Safety Engineering since 2008.

The objective of running a Diploma course is to develop professionals who have adequate knowledge of the subject and have the confidence to apply practical skill to any real-life situation in any organization. In addition to the theory and practical coaching in technical subjects, the students undergo training in soft skill and personality development programs, so that students who complete the course will have the capability in terms of professionalism and personality.

Note: - In view of the prevailing pandemic situations we are constrained to conduct the theory classes in ON-LINE mode till such time the restrictions as per Government order are lifted. Practical sessions will be conducted while adhering to distancing norms / Covid protocol. During practical sessions, the students will have to make their own arrangements for food/refreshments as distancing norms are being followed in Company canteen.

Features of 1-year Diploma Course in Fire & Safety Engineering.
